# Sam Rivera

London, United Kingdom | sam.rivera@example.com | +44 7700 900123 | LinkedIn | GitHub

Backend engineer with six years building APIs and data pipelines for product teams. Happiest owning a service end to end, from schema design to on-call.

## EXPERIENCE

**Senior Backend Engineer | Greenline Energy** | London, UK **2022–Present**

*Climate-tech start-up forecasting home energy use.*

- Designed the **Go** services behind the customer API, handling **4 million requests a day** at 99.95% availability.
- Moved nightly batch jobs to a **Kafka**-based pipeline, cutting forecast latency from 12 hours to 20 minutes.
- Introduced **PostgreSQL** partitioning and query reviews, halving the database bill.
- Mentored two junior engineers through their first on-call rotations.

**Backend Engineer | Patchwork Health** | London, UK **2019–2022**

- Built shift-booking APIs in **Python (Django)** used by 30 NHS trusts.
- Wrote the integration layer for three hospital rostering systems over **REST** and **SFTP**.
- Added tracing with **OpenTelemetry**, cutting incident diagnosis time by a third.

## EDUCATION

**University of Leeds**, BSc Computer Science (2019).

## SKILLS

Go · Python · PostgreSQL · Kafka · Docker · Kubernetes · AWS · Terraform · OpenTelemetry · CI/CD
